PROFESSIONAL SUMMARY

AI Product Leader and former Principal Engineer driving multi-agent systems and Generative AI strategies for Fortune 500 platforms. Proven track record of hands-on prototyping, building model-agnostic tools, and scaling agentic workflows from zero to enterprise-wide adoption.

CORE COMPETENCIES

AI Product Management

Generative AI

Agentic AI

Prompt Engineering

Product Strategy & Vision

Go-to-Market Strategy

Executive Stakeholder Management

Case Management

Cross-functional Leadership

API Design & Governance

Rapid Prototyping

Pega Platform

Microservices Architecture

WORK EXPERIENCE

Senior Product Manager (Pegasystems, Hyderabad, India)

Sep 2025 - Present

AI Assistant (Infinity 26): Owned the product vision, roadmap, and cross-org execution for Pega's flagship agentic AI assistant. Enabled developers to author application rules through natural language, driving 30% improvement in developer productivity. Showcased on mainstage at PegaWorld 2026 by the CPO.

Multi-Agent Architecture & Guardrails: Led the sub-agent system strategy across engineering and design - delivering memory, compaction, and output quality capabilities that enable the AI Assistant to operate reliably within enterprise guardrails.

Product-Led GTM & External Ecosystems: Launched marketplace plugins for Codex and Claude Code, enabling the partner ecosystem to "vibe code" Pega applications with backward compatibility across Infinity versions.

GenAI Observability & Agentic Case Processing: Owned end-to-end observability for GenAI rules across Coach, Connect, and Agent executions. Pioneered agentic case processing strategy, evangelizing across Sales Automation, Customer Service, and SmartDispute - boosting internal agent adoption by 50%.

Product Manager (Pegasystems, Hyderabad, India)

May 2023 - Sep 2025

Launchpad

- Blueprint Ingestion:** Owned end-to-end delivery of Pega's AI-powered app generation feature by taking the Blueprint as input to accelerate development of application and iterating from there making teams to go live faster. Defined business value, directed user journey design, and drove cross-functional execution. Featured as a key product differentiator at PegaWorld 2024.
- Cross-Org GenAI Deployment:** Coordinated GenAI capability deployment across 5+ organizations to Launchpad - driving shared outcomes without direct authority across a complex enterprise matrix.

Infinity

- Accelerating Platform with Generative AI:** Led the product vision for embedding GenAI into Pega App Studio - owned the GenAI Connect rule type and evolved it into document-processing AI use cases, boosting customer adoption of the Pega platform.
- AI Designer:** Drove the vision and roadmap for AI Designer, delivering features in Infinity 24.2 and coordinating cross-product adoption with the Blueprint team, establishing GenAI as a strategic platform pillar.
- SLA Queue Processor:** Took end-to-end ownership - architected the implementation strategy, coordinated with Engine and Case Management teams to resolve technical blockers, and delivered the feature to completion. Drove customer adoption with usage exceeding 1 lakh queue entries in production workflows.

Principal Software Engineer (Pegasystems, Hyderabad, India)

Mar 2021 - May 2023

- API Design & Architecture:** Designed and shipped resilient APIs across multiple microservices in Launchpad (v0.5 to 2.0), scaling the platform to serve thousands of requests daily for provider applications - ensuring performance and reliability through rigorous architecture reviews.
- Security & Compliance:** Led organizational SLO epics generating assets for DAST, SAST, and Threat Modeling. Transitioned security knowledge to adjacent teams through documentation and training.
- Competitive Analysis & POCs:** Conducted deep-dive competitive platform analyses (Salesforce, ServiceNow, GlooEdge), developing reusable POCs that directly influenced implementation strategies.
- Product Management (Shadow) 2021-2023:** Played the role of Product Manager through the job-shadowing programme to lead and delivered critical features across Launchpad microservices, gaining Product Management insight that steered the transition to full-time Product role.

Senior Software Engineer (Pegasystems, Hyderabad, India)

Sep 2017 - Mar 2021

- Pega Process Fabric:** Owned critical modules including Registration, Security, and API layers in Pega Process Fabric - the enterprise integration layer that weaves together disparate systems without custom code. Scaled the platform to production across 20+ enterprise clients with thousands of

registered applications, ensuring reliability and zero critical defects.

- **Case Management:** Developed and shipped new smart shapes now widely used in workflows, and enhanced engine APIs to improve performance by 30%.
- **Collaboration Platform:** Delivered task board and collaboration improvements that enhanced team productivity and transparency.

Senior Development Engineer (Pramati Technologies, Hyderabad, India)

Oct 2016 - Sep 2017

- Designed and delivered client solutions across cloud and enterprise stacks. Owned full delivery lifecycle - requirements gathering through deployment - for multiple concurrent enterprise projects.

Development Engineer (Pramati Technologies, Hyderabad, India)

May 2015 - Oct 2016

- Developed hybrid applications on WaveMaker (RAD tool). Powered complex enterprise computations using Java logic and streamlined internal leave management systems.

Assistant Systems Engineer (Tata Consultancy Services, Chennai, India)

May 2013 - May 2015

- Key developer for Dashboards, Reports, and Charts modules in MasterCraft Service Governance Manager. Built high-performance reporting features for enterprise service governance used by 50+ client deployments.

ACCOMPLISHMENTS & RECOGNITION

4X4 Award, Pegasystems: Awarded for owning and delivering the AI Assistant in Q2 2026 - coordinated cross-functional stakeholders to successful outcome.

Real Time Recognition Award, Pegasystems: Awarded for successful delivery and cross-team coordination of the SLA Queue Processor adoption epic.

Agentic AI Hackathon Runner-Up (Airtribe x PineLabs): Prototyped a gamified payment gateway integration using advanced Agentic AI capabilities, securing runner-up among 20+ teams.

SuperHack 2025, Global Top 100: Developed the "MSP Profitability Agent," an autonomous operational efficiency agent competing globally in advanced multi-agent system design.

Google GenAI Exchange Hackathon: Architected and deployed the "LVX Agentic Hub," a multi-agent investment evaluation platform built on Google Cloud.

Prompt Engineering & GenAI Enablement: Designed and delivered workshops for 15+ Product Managers, recognized as organizational SME. Presented at company-wide GenAI Innovators Showcase (3 sessions); demonstrated A2A orchestration at AI Fusion Fest and Technovate.

API Council Membership: Active contributor to API design governance (Nov 2022-present), reviewing and approving cross-service API specifications for the platform.

PRODUCT PORTFOLIO

Content Crafting Wand for LinkedIn

Privacy-first, open-source authoring suite for feed-accurate previews with user-owned keys; validated through organic adoption. funny-belekoy-39b0f8.netlify.app

DocBridge - One Upload Layer for India

Citizen-centric upload layer for Indian government portals integrating DigiLocker with on-device processing; web app + Chrome extension. incredible-taffy-db08a6.netlify.app

Pregnancy Blossom Journal

Privacy-first offline PWA for expectant families; week-by-week milestones and on-device AI reflections. pregnancy-blossom-journal.netlify.app
